

A ceramic plate with a white, scalloped rim and a green and blue marbled interior. The plate is shown from a top-down perspective, split vertically. The left half shows the white rim and the inner circle, while the right half shows the marbled interior. A small, dark, metallic object is visible in the top right corner.

About us.

Ceramikon Studio

is a handmade ceramics studio based in Poland. We create handmade ceramic tableware. From the initial concept to the finished product, every piece is crafted with care and attention to details.

We make our ceramics by hand on the potter's wheel and also produce our own plaster molds. This allows us to create unique, distinctive pieces, each with its own individual character.

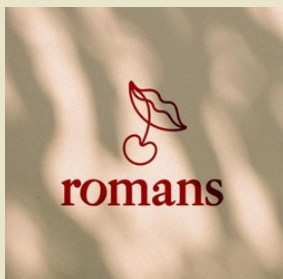

Handmade ceramic tableware

We collaborate with chefs and restaurants from Poland and Germany, primarily with restaurants featured in the Michelin Guide. We create bespoke collections that reflect the identity of each venue.

Ceramikon Studio designs and produces handmade ceramic tableware for restaurants, hotels and hospitality spaces. From a single signature piece to a complete tableware concept, every collection is crafted in Poland and tailored to the dining experience.

Dining experience

**Romans
Restaurant**

**Chef co-owner
Ewelina Panfiluk**

Our work goes beyond creating ceramics— it is about adapting to the vision of the chef and the restaurant owner.

We design and produce complete tableware collections tailored to the restaurant's concept, style, and dining experience. Each piece is carefully crafted to complement the restaurant's identity and enhance the presentation of its cuisine.

Design concept

NARE SUSHI

**Chef co-owner
Monika Kasprzak**

We create individual collections of tableware tailored to the specific needs of restaurants.

We also take part in larger projects where we immerse ourselves in the chef's vision and work together to create a place that guests will want to return to again and again.

Welcome
to the world of
ceramic tableware
