POEMI

A CUP WORTHY OF YOUR COFFEE

POEMI is a boutique factory dedicated to designing and manufacturing tableware from plates to coffee cups.

Each POEMI piece carries the imprint of hard work, creativity and transformation - from the bowl of clay to the final piece. Crafted from stoneware and fired at high temperatures, our ceramics undergo a slow, deliberate process that takes several weeks. The result is objects designed to endure: resistant, waterproof, and safe for both home and professional use.

Every piece blends timeless design with functionality, durability, and a deep respect for nature. In our effort to minimize waste, we recycle all leftover stoneware from production, repurposing it into new pieces and glazes.

In order to create unique and stunning textures, we integrate another reclaimed material to some of our glazes, which is the wood ash, that we collect from our community - a gesture of connection and continuity.

We see our ceramics as quite canvases, something that enhances rather than competes with the food, that creates harmony on the table. A quiet presence that perfect a meal, frames a story, and invites people to slow down, connect, and appreciate craftsmanship.

Constantin Brâncuși once said, “Beauty is the absolute fairness.” That is our purpose at POEMI: to bring beauty to the table through a fair, thoughtful, and respectful process of making.

The production process is complex and lasts for about four weeks, needing all our attention and care. After being manually made, the items are left to dry, until they are ready to be placed into the kiln. Next, the bisque firing follows, in special electrical kilns, at temperatures between 950 and 1000 degrees Celsius. A single firing cycle lasts for approximately 48 hours.

After the bisque firing, the items are glazed and a second firing cycle follows, at temperatures that vary between 1200 and 1280 degrees Celsius.

POEMI has a commitment to quality, aesthetics and particularly, to sustainability. In an effort to minimize waste, we recycle all the leftover stoneware during the production process and we repurpose it to make new pieces and glazes.

In order to create unique and stunning textures, we integrate another reclaimed element to some of our glazes, which is the wood ash, that we collect from our community. The color of this organic glaze is unique and might change from time to time, due to its reclaimed components.

ZeRaw tag, derived from "zero" (zero waste) and "raw" (the texture of the glaze with wood ash), highlights the products that feature this unique reclaimed glaze. ZeRaw embodies our sustainable practices, transforming waste into beautiful, ever-evolving pieces.

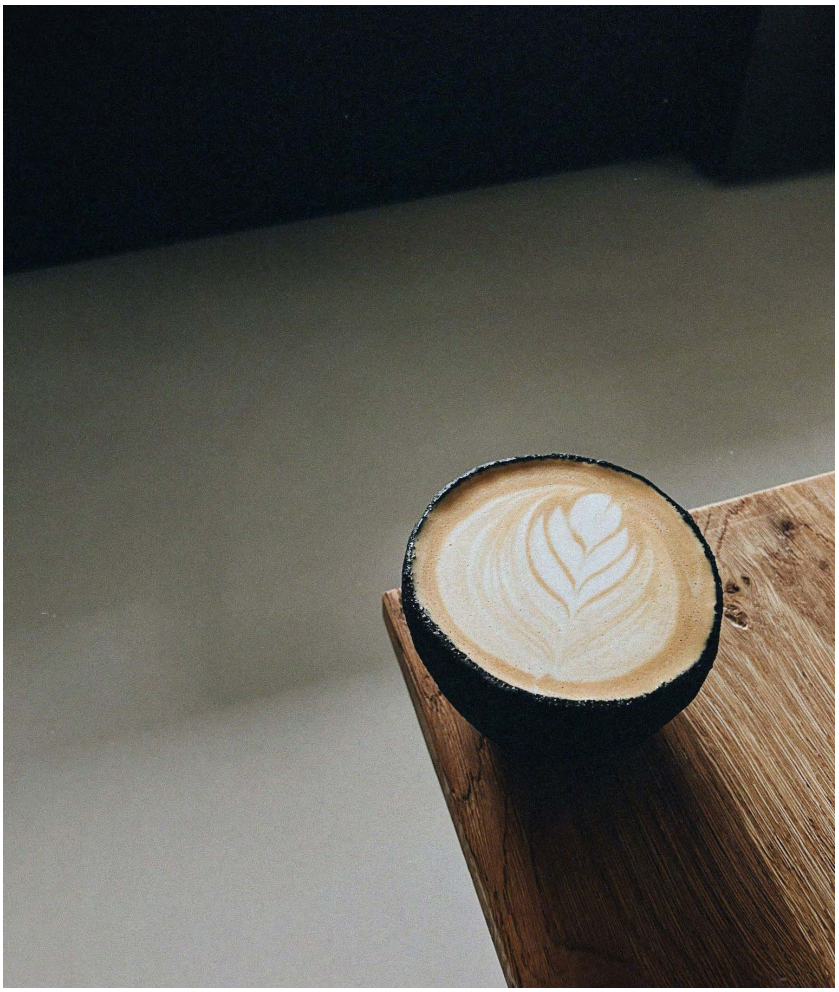

MEET THE CREATORS

We are Alexandra and Florin, two young people who embarked on a remarkable journey into the world of ceramics driven by our love for craftsmanship and beauty. Back in 2016, with no prior experience in pottery, we commenced a self-taught adventure that has transformed our lives and ignited a passion within us that continues to burn bright.

We learned all by ourselves for two years, we honed our skills, pushing ourselves to unravel the mysteries of ceramics. With each clay-soaked day, we deepened our understanding of this exquisite art form. We learned to blend creativity with functionality and durability, transforming raw materials into timeless pieces that captivate the eye and enchant the senses.

Over the past years, we have had the privilege of designing numerous custom tableware projects for both local and international restaurants. We have embraced the opportunity to educate consumers about the importance of choosing sustainable, simple, and durable ceramics for their homes.
