Mr. Sammi, The Netherlands

FREDDY'S Gastrobar en Netherlands

PERSONALIZE YOUR PORCELAIN, GLASSWARE OR GREASEPROOF PAPER

Personalized porcelain, glassware or greaseproof paper makes your table setting even more unique and personal! Due to the wide variety of possibilities within our ranges, we look at each project individually. We can send you a **quote**, matching your specific requirements. Quotes for glassware and porcelain are possible from 48 pieces and for greaseproof paper from 40 packs. Your logo is burned into the porcelain and is **dishwasher safe**. Simply send us your logo/design digitally as **EPS** file with the desired pantone colours in PMS. You can also receive **samples**, for which costs will be charged. After your final confirmation, the products will be printed. This usually takes around three weeks.

Contact us for advice or a quote and you will be amazed by the **convenience** and **pricing**!

If you apply a logo to glassware or tableware, this may affect the strength of the product.
There is no longer a chip warranty on products after the personalization.

Lolita, The Netherlands

BUFFET

TRAYS, RISERS AND COOLING SOLUTIONS

NEW

Discover our latest buffet collection, where style and functionality come together perfectly for any cold buffet presentation. This collection features **gastronorm buffet items**, including cutlery holders, wooden, porcelain, and stainless steel buffet trays, cooling elements, slate presentation boards, and buffet holders with cutouts, offering endless combination possibilities. Thanks to the convenient gastronorm format, all components are easily interchangeable and simple to combine for the ideal setup. The natural wood finish adds a warm, rustic touch to your buffet, while the **cooling elements** ensure that your dishes stay at the perfect temperature for up to 3 to 4 hours.

PERSONALIZE YOUR PORCELAIN, GLASSWARE OR GREASEPROOF PAPER

Personalized porcelain, glassware or greaseproof paper makes your table setting even more unique and personal! Due to the wide variety of possibilities within our ranges, we look at each project individually. We can send you a **quote**, matching your specific requirements. Quotes for glassware and porcelain are possible from 48 pieces and for greaseproof paper from 40 packs. Your logo is burned into the porcelain and is **dishwasher safe**. Simply send us your logo/design digitally as **EPS** file with the desired pantone colours in PMS. You can also receive **samples**, for which costs will be charged. After your final confirmation, the products will be printed. This usually takes around three weeks.

Contact us for advice or a quote and you will be amazed by the **convenience** and **pricing**!

If you apply a logo to glassware or tableware, this may affect the strength of the product.
There is no longer a chip warranty on products after the personalization.

Lolita, The Netherlands

PRODUCT CARE

PORCELAIN

All our PORCELAIN is suitable for use in (industrial) dishwasher, microwave and oven. It is important that the guidelines of the dishwasher manufacturers dishwashing are followed. Excessive rinse temperatures and overdosing on detergent can cause damage to the glaze. Most damage occurs during loading and unloading the dishwasher. Preferably use special (plates) dishwasher baskets that prevent contact with other PORCELAIN during the dishwashing process and loading and unloading. When removing food waste use a plastic scraper prior to the washing process to prevent enamel damage. Never use metal objects or cutlery for this purpose. Cutlery and other metal objects, such as pans, should never be be washed at the same time with dishes as these are metal marking can cause. Remove any resulting cutlery stripes/metal marking with a mild abrasive or a cleaning agent for ceramic hobs. Or use our PORCELAIN cleaner (item number: 2000788)

PORCELAIN CLEANER BOTTLE
2000788 230ml

VOLCANIC GLAZING

The plates have a volcanic glaze. Pleats, bumps or hard pressure on objects may result in the release of volcanic glaze flakes. Always check that the plates are free of chips before use. Because of possible health risks, these flakes are not suitable for eating. Volcanic glazing is purely decorative and it is not intended to be eaten or absorbed into the surface cutting. Do not serve food on the surface of the volcano glaze. These plates should be washed and cleaned ideally done in an industrial dishwasher.

WOOD

Wood types are not suitable for use in an (industrial) dishwasher. The appearance of the product can be maintained by regularly rubbing the surface with (vegetable) oil. Under no circumstances is it permitted to use water to soak acacia wood as this will cause warping and splitting the wood. The wood must be hand washed in warm soapy water and then dried immediately or let it dry standing. Wood is a natural product and will leave signs of wear after a period of use. In addition, each wooden plank is unique and there may arise color differences between the different planks. As of 500 pieces we can produce customized wooden products (including logo).

GLASS

All glasses can be washed in an (industrial) dishwasher. We recommend using dishwasher baskets to minimize breakage during the washing cycle and use a non-corrosive cleaning agent while washing the glasses. Since caustic cleaning agents parts can damage the surface of the glasses and make it dull. Always wash new glasses before using them.

Never wash glasses at a temperature above 60 degrees Celsius. Higher temperatures may cause dirt to bake into the glasses. Do not put cold liquid in warm glasses; this can cause the glass to crack. It is also advisable to warm a glass by placing it underneath a warm tap before adding a hot liquid.

CRACKLED GLASS

These products are made of hand-blown glass and require careful handling.
We recommend the following maintenance and usage tips:

- Clean the plates with water before use.
- Do not cut on the plates.
- The plates can be used for hot dishes provided that the temperature difference between the plate and the dish is not greater than 50 degrees Celsius.
- Stack everything with a layer of paper, cardboard or fabric in between and not directly on top of each other.

MELAMINE

Melamine can be washed in an (industrial) dishwasher machine. Do not use abrasive cleaning agents, bleach, scouring pads or metal objects to clean melamine as the melamine can be scratched. Melamine is not suitable for use in the oven or microwave. In addition, we advise against cutting on melamine with a knife or another sharp object. Melamine products are suitable for use in au bain maries or chafing dishes. When used in chafing dishes it is important that there is sufficient water in the chafing dish. Our melamine products are approved by Intertek and the Dutch Food and Consumer Product Safety Authority checked and tested for operating temperatures between -20 and 70 degrees.

CUTLERY

It occasionally happens that new cutlery shows stains and/or metal marking after the first use. This are often caused due to the handling of the cutlery. All 18/10 cutlery, regardless of brand and pricing, is made from the same type of steel. Falling on old, scratched and dull cutlery These phenomena are less noticeable on old, scratched and dull cutlery, but with new cutlery a lot more noticeable. We provide a number of tips for preserving your cutlery, to prevent stains on the cutlery and to prevention of metal marking on tableware.

Before using cutlery for the first time:
Wash cutlery by hand before first use so do not wash immediately in the dishwasher. During the last process in the factory the cutlery parts are polished. This is done by a polishing polish which mostly disappears during polishing. However it can happen polish remains on the inside of the fork tips and/or the cutting surfaces of the knives. It is important to remove this before it comes into contact with aluminum, stainless steel or certain substances in dishwasher detergents. When in contact with these materials it can cause a chemical reaction that leaves rust / blue deposits on the blade steel. If the knives are put into use immediately (without first being washed by hand). Metal markings may appear on the tableware.

General tips:

- Remove food remains as quickly as possible from the cutlery, especially in the beginning.
- It is best not to put cutlery in the dishwasher at the same time with aluminum pans or stainless steel cutlery. (Through electrolysis* this may cause spots/spots on the cutlery to arise.)
- Do not pre-soak cutlery, i.e. do not leave in water for a long time before washing.
- Keep knives in the dishwasher separate from the rest of the cutlery.
- Place knives upright in cutlery cup. Do not treat cutlery with chlorine-containing or other aggressive substances when trying to remove dirt and stains.
- Cutlery should preferably be dried and polished immediately after washing and do not leave in a closed dishwasher for too long.

* electrolysis: 'poor' metals lose out on precious metals

STAINLESS STEEL

Our stainless steel products can be washed in (industrial) dishwashers machine, unless otherwise stated. We provide a number of tips for preserving the stainless steel products to prevent stains:

- Be careful with salty or acidic substances. For example, vinegar or lemon juice corrodes stainless steel. Polish stainless steel immediately after contact with these substances, otherwise you risk white spots or dimples.
- Be careful that stainless steel does not get too hot, otherwise blue-brown stripes are created that can only be removed with professional stainless steel maintenance products.
- Do not use steel wool or abrasives that leave scratches behind.
- Stainless steel objects can easily stain; it can be removed with a cotton cloth with a few drops of salad or olive oil. Rub the object with this and if necessary, wipe with a dry cloth.
- Occasionally some ammonia can be added to the water to clean stainless steel. Use a soft cloth or brush that does not leave scratches.

CAST IRON

Cast iron is ideal for serving dishes straight from the oven as it can withstand high temperatures. However it is not suitable for the microwave and dishwasher.
Cast iron is susceptible to rust and must be cleaned and dried immediately after use. To promote longevity, we recommend that the products are lightly greased with oil before storing.

ENAMEL

Although enamel is a hard product, it can chip if it is used incorrectly or ages. To extend the lifespan we recommend the following to extend:

- Wash before first use.
- Before use, lightly grease with cooking oil to protect the enamel product against stains and it will make easier to clean.
- After use, wash the product in warm or hot water with liquid detergent.
- Do not use a scouring pad or other abrasive cleaner manufacturing products; this can lead to chipping.
- Do not place empty enamel products on a hob or gas stove and do not use them for dry cooking.
- Handle enamel products with care. An enamel product may chip if dropped or roughened.

Enamel is suitable for the dishwasher and use in ovens up to 270 degrees Celsius. All enamel products are double glazed for optimal durability. They are not suitable for in the microwave.
* Important to know: do not use enamel products that are chipped. There is a risk that pieces end up in the food.

GALVANIZED STEEL

Galvanized products are not suitable for the dishwasher or microwave. In addition, direct contact with food is also not recommended. For that reason we always recommend for it to be used in combination with greaseproof paper.

COPPER STAINLESS STEEL

Our copper products are not allowed in the dishwasher, because this can damage the copper layer. We therefore recommend to wash the items by hand. Clean with a soft sponge, brush or cloth that does not leave scratches. Do not sue hard cleaning supplies when handling and dry the product thoroughly afterwards. For some extra shine copper products can be rubbed with a soft dry cloth. Make sure that the copper products come into direct contact with foods that have natural acids such as lemon and vinegar, which can damage the top layer.

WOODEN BUFFET PLATES

Wooden buffet dishes are not dishwasher safe. Do not soak the bowls. Immediately after use clean with a with a wet cloth and dry.
